

THE SIBONGILE SHOUT OUT

March 2019

"Nothing ever becomes real until it is experienced" – John Keats

New programs

On our last "SHOUT OUT" we announced our very own program implementers. These selected program implementers are now hands on in all the houses, including the Day Care Centre. This is one of the Organization's huge upliftment's to have someone specifically for this particular task, to critically think these type of programs from the ground and to implement them. They obviously receive warm assistance from the Management team that meets every Wednesday of the week.

Team work

It was indeed one of the Director's dreams to have a team of core-workers working together towards the same goal "the one particular goal" caring for the beneficiaries of the Organization, 24 hours a day. Care givers meet every last Thursday of the month together with the Management's team. On this meeting a monthly report is issued. Ideas from the carer gives are welcomed, suggestions are welcomed, and complaints are addressed. It is important that care givers get to know each other as they work in different houses, but in this case they work for the same Organization

towards improving the children's health.

New development(s)

Every once in a while staff come up with ways of coping with disability and assisting children. It is not an everyday life that you get to see our children working by themselves, but it takes time, patience, love and so forth. Muscle training is one of the new developments that are on the process. When I say "muscle training", already you have an idea of what I am talking about

See Below:

Muscle training

Dept of Education

Yeeeees ☺ The department of Education is still with us, they meet with the selected staff and exchange ideas together and actually experiment them together. Staffs are happy with this collaboration as they said it is the platform for them to make use of their ideas because they are given a chance to have a say. When they come up with their ideas they will be immediately be told if they are appropriate or not, whether they are applicable or not. When these experiments take place you can see the excitement on the kids faces, and u just know they love it and when they don't, they show it, and suddenly there is no cooperation from the kids.

HAPPY BIRTHDAY

During this period of the Shout out newsletter we have wished happy birthday to Teacher Rebecca Taho, Teacher Vuyiswa and Learner Amahle. We hope they had one of those fabulous days especially with their families. We wish them many more years to come. May God bless them daily.

Staff on Uniform

It is a navy beautiful uniform; they wear it on a daily basis. It's been a while ☺

See Below:

Uniform Sample

Parental Meeting

These are our children that we love, endure and cared for.

But it is true that these are not our children by birth, and it is such a privilege and honour to see their parents attending parental meeting and supporting people working with their children and for their children. It is such a lovely feeling when they have eager to hear their children's progress and daily live. Through the parental meeting we are receiving quite a huge response from the parents. From the Physio side, Becky the Physiotherapist

is always present to explain to the parents the need for the Physiotherapist in their children's lives.

Parent's meeting attendance

Sponsor a Child Program

Let us introduce to you once again a Sponsor a Child Program. A sponsor a Child programme is one of the ways where we allow the public to have a personal relationship with our children. This way a member of the public chooses a child he or she will want to sponsor on a monthly basis. This Sponsor will be kept informed about the child's progress once in six month in a form of a child's report. For more information on the processes and procedures of this program please contact Eyethu Ningiza on the contact info below: eyethu@sibongile.org

Community work

We realised acceptance from the public when we see unannounced visits from the group of pupils from the public or community. These pupils are from the They visit the centre from time to time and clean the yards. It is indeed a blessing. ☺

Julienne Physio

Julian working hands in hands with our very own Physiotherapist Becky Molinini for a short period of time

will be saying her goodbyes in the Month-end of April and we would like to take this opportunity to thank her for all the goods she has done for the centre and for all the smiles and joys we have experienced with her, we hereby wish her all the best and hope to see her someday soon.

Love and Kindness are never wasted. They always make a difference.

Care Taker

He has it in his heart and makes it his baby to take care of the care-takings of the Organisation. Maintenance of the house is his middle name. And his name is Mthuthuzeli Monakali. He is one of the new pupils of the Organisation and also one of our respectable drivers

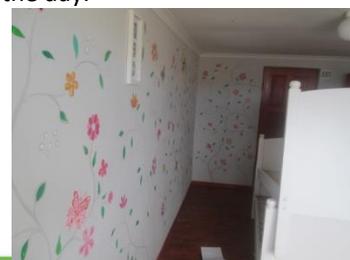

See how neat the day-care is

KLM-WJNGS OF SUPPORT

More blessings for the KLM group. They came to the organisation to do

what they do best. Helping without expecting anything in return. It was such a happy day when they turned the inside of the Sibongile walls into something I would call a live child-hood environment. It is not on a daily basis that we get a group of people ready to get their hands dirty without expecting in return, especially in the days we live in. Below, see pictures that were taken on the day.
